YEARS	SUCCESSFUL JOBS

It's often the things you can't see that make all the difference.

Will the furniture complement your space? Will it stand the test of time? What happens if something goes wrong? You can rely on us to provide a trusted and timely solution for any and all of your concerns.

When you choose Nextrend, you'll be assured of

• Friendly guidance & advice throughout the entire process – from your first enquiry through to after-sales support

• Freight replacement guarantee should your furniture get damaged in transit

• Flexible finance, including a rent-to-buy option, to meet your budget requirements

Simply, we care...a lot. And we'll be proud to prove it to you!

Design your space, your way.

Obligation free Consultation and 3D design of your venue.

Cosy cafe, fine dining restaurant or 5-star hotel, you didn't start your business just to be like everyone else.

And that's exactly why we don't believe in a one-size-fits-all approach when it comes to fitting out your venue. Whether it's creating award-winning interior aesthetics or squeezing in more patrons in a tight space, you have a vision and we're here to help you achieve it.

Assuring your confidence and return on investment, our design consultants can use specialist 3D rendering software to draw up your venue, along with adding our recommended furniture pieces, to bring your big-picture design ideas to life.

Why choose our custom design service?

Focusing on your goals, our custom design service empowers you to optimise your space with the best furniture and layout options.

You'll be provided with a full-scale 3D walkthrough of the designed layout, with your chosen furniture additions, so you can picture what the space might look like before committing. Tweak and refine your choices to your heart's content!

Once you're happy with the overall space planning and design, our team will then work on the real-life transformation, from ordering the furniture to the final fit-out and installation works.

With our level of commitment to exceling on your project, you will barely have to lift a finger.
